Anodes: Hard Chrome Plating, Decorative Chrome Plating, Anodizing, Tin & Solder Electroplating, Hot Air Leveling, Galvanizing, Metallizing

Alloys:

- Alchemy utilizes only the finest primary materials in the manufacturing of its products.
- Find below a list of the raw metals that we alloy with to produce any configuration you require.
 - Tin (Sn): Complies to ASTM B339 - Grade "A" Tin.
 - Lead (Pb): Complies with ASTM B29 - Corroding Grade Lead.
 - Antimony (Sb): Complies with ASTM B237 - Grade "B" Antimony.
 - Cadmium (Cd): Complies to ASTM B440
- We also produce alloys with additions of Silver (Ag), Bismuth (Bi), and Aluminum (Al).

Anode Hooks:

- This is a list of our most common bronze hooks. Copper hooks are available upon request.
- All hooks can be Plastisol covered or Lead covered, just let us know in advance.

Sample Picture	Hook Number & Style	Dimensions	Metal
	#1 Single Knife Edge	From Top of Conductor Bar to Anode Shoulder: 3-1/2" Knife Edge: 1/2" Thick	"C" BRONZE
	#2 Single Knife Edge	From Top of Conductor Bar to Anode Shoulder: 3-1/2" Knife Edge: 5/8" Thick	"C" BRONZE
